

Resident Alert System

For Nursing Home Administrators

LONG-TERM HEALTHCARE PROFITABILITY SPECIALISTS

The Resident Alert System was designed specifically for Nursing Home Administrator's to monitor, track and record response times of staff. The Resident Alert System is a powerful information tool that can easily be implemented into an existing environment and will provide your organization with enhanced efficiencies. This tool will help you increase your profits by providing immediate records on your staff and residents so you can effectively monitor the quality of care within your facility.

The AME Group has 21 years experience as long-term profitability specialists. Our award winning methodologies have allowed us to minimize our client's technology expenditures. We understand that the issues that concern you on a daily basis are insurance reimbursements, legislative compliance and the providing of quality care to your residents. The Resident Alert System will assist you by managing your risks and providing a guarantee that your residents are responded to within a timely fashion.

Benefits of the Resident Alert System:

- Improved staff utilization and resident satisfaction
- Managed risk factors including legal protection against fraudulent claims
- Escalation reporting of untimely responses via email and paging
- Reporting of operational/staffing trends and quality of resident care
- Flexibility in combining legacy systems
- Assistance in determining the best practices for your organization
- Marketing tools to offer families security and peace of mind
